

Mystical Slime Spell

Ingredients:

1 - 4 or 5 oz. bottle of glue (white, clear, glitter-your choice)

1/4 tsp. pixie dust powder (*aka baking soda*)

1 tsp or so of liquid luck (*aka contact lens solution*)

Optional: Rainbow drops (*aka food coloring*)

Directions:

Pour entire bottle of glue into a bowl or onto a paper plate. Sprinkle with 1/4 tsp of pixie dust powder. Mix completely with spoon. Add a couple of drops of rainbow drops and mix well. Add a few drops of liquid luck at a time and mix with spoon. Magic mixture with start pulling together immediately. Keep adding drops of liquid luck and mixing until mixture starts to form into a stringy ball.

Now put some liquid luck on your hands, pick up the magic mixture and start kneading it. It will be sticky, but kneading it with your hands is how it transforms into Magical Slime. The more you work it, the better.

If you find it is still a bit sticky after a few minutes of kneading, you can add one or two drops of liquid luck, but be careful. Too much liquid luck and your slime will break.

Adding Enchanted items:

During the kneading process, you can add fairy sparkles (glitter) and elf twinkles (sequins) or other enchanted items (small buttons, seashells (for mermaid slime!), confetti, small figurines, googly eyes, etc.)

Magical Fluff Spell

Add in the pixie dust powder/liquid luck solution and mix until putty forms. Knead for about three minutes then place in a Ziploc bag for an hour or two. Take out your magical fluff, knead a bit and have fun.

Note: When kneading you can add enchanted items to make it *super magical*.
